

Sample Soil Health Card / Soil Test Report

Use this file to test AgriSarathi AI PDF intake. This is sample data only.

Farmer and Field Details

Field	Value
Farmer Name	Ramesh Kumar
Village	Warangal
Mandal	Hanamkonda
District	Warangal
State	Telangana
Crop	cotton
Season	kharif
Sample Date	2026-07-01

Soil Nutrient Results

Parameter	Value	Unit	Interpretation
pH	7.6	-	Slightly alkaline
Electrical Conductivity EC	0.82	dS/m	Normal
Organic Carbon OC	0.42	%	Low
Nitrogen N	240	kg/ha	Low
Phosphorus P2O5	18	kg/ha	Low
Potassium K2O	130	kg/ha	Low
Soil Type	black cotton soil	-	Suitable for cotton

Recommendations

Use black soil as the advisory soil type. Prefer split nitrogen application, add FYM or compost to improve organic carbon, include phosphorus in basal dose, and add potash support for cotton.

Keywords for parser: pH 7.6, Nitrogen 240, Phosphorus 18, Potassium 130, Organic Carbon 0.42, EC 0.82, black soil, cotton, kharif.
